

GROW UP TO
5X MORE

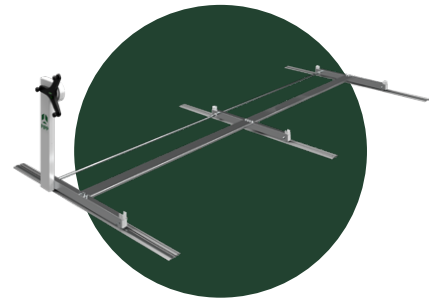

NEW & IMPROVED

Pipp's Mobile Vertical Grow Systems have been fully redesigned to combine the top features of Pipp's products with Grow Glide Innovations. With a new modular design, this system provides increased tray and aisle accessibility, improved packing density for transportation, and a more flexible installation process. These systems are fully customizable to meet all of your needs and maximize your grow space.

MODULAR CARRIAGE SYSTEM

Pipp's Mobile Vertical Racking System features a Modular Carriage with a durable construction and corrosion-resistant materials that increase the lifespan of the carriage and allow it to easily handle the weight load of any cultivation style. These systems are available in custom sizes to optimize your space and adjustable Anti-Tip Mechanisms allow for seismic compliant designs.

NEW FEATURES

- **Skate Channel System:** Creates easy to access aisles with improved alignment and smooth rolling performance.
- **Central Spanner:** Maximizes tray access by removing obstructions.
- **Direct Drive Mechanical Assist:** Shifts Drive Box to left side and reduces connections/failure points.
- **Drive System:** Extends the maximum length for both driven and manual systems.
- **Uprights:** Improved connections/corrosion protection by eliminating the need for self-drilling fasteners.
- **"Drop-In" Drive Pipe:** Improves the durability of drive connections and allows for easy installation.

IN-RACK AIRFLOW

The VAS® 2.0 delivers maximum air velocities, while maintaining consistent performance across varying row lengths. This highly modular system allows for multiple configurations to meet the airflow needs of your crop.

MODULAR RACKS

Pipp's Modular Bulk Rack System is constructed from durable 14 GA steel, eliminates interference points with adjustable spanners, and features a dual coat finish providing corrosion resistance and anti-microbial/fungal properties.

GROW TRAYS

Pipp offers a variety of Grow Trays with connection points for lights, air circulation, and plumbing that allow you to easily access and care for your plants. All Pipp Grow Trays are fungal-resistant and anti-microbial.

ELEVATE® PLATFORM SYSTEM

The ELEVATE® Platform is a robust, lightweight, and portable deck that allows cultivators to easily and safely access the upper levels of their racks. This patented system integrates with Pipp's Bulk Racks without any modifications and can be installed on new or existing racks. Pipp offers design services to customize your ELEVATE® System to fit your racks.
